

MAINTENANCE GUIDE / MARBLE - KITCHEN

Please read the following maintenance guide before using your new Marble product to ensure a well-protected and beautiful surface. Marble is a nature stone, where the stone can naturally change in colour from product to product. This is normal for the natural marble stone and makes each marble stone unique.

BEFORE USING THE PRODUCT /

The product is ready for use and do not need any further treatment.

DAILY MAINTENANCE /

Use a lint-free cloth and wipe immediately after spills. Never use strong soap or cleaning products as this will dissolve and remove the surface.

GENEREL MAINTENANCE /

- NOT dishwasher safe.
- We recommend that you dry the product directly after washing with a neutral soap.
- Foodsafe
- Be careful with oil- and colourbased food, because it can damage the marble.
- Natural stone such as marble does not tolerate any kind of acid.

CORRECT MAINTENANCE IS IMPORTANT /

Depending on natural conditions the colour and pattern of the marble will vary.

If any further questions, feel free to contact MUUBS.
